Instructions for voting: Shareholder chooses one of the two following election methods:

A. The first election method (equally dividing the number of shares among the nominees):

- Shareholder writes the number of the nominees for whom the shareholder wants to vote in the rectangle box and mark X or V in the square cells aligning with the names of those nominees.
- Shareholder writes the numerical order (refer to the first column of the following table) of one nominee into the rectangle box at the last row in order to accumulate the integer number of votes to such nominee.

B. The second election method (electing with different percent among the nominees):

- Shareholder wants to vote for a nominee is required to write the number of votes into the cells aligning with the name of such nominee. **Each cell shall be filled with only one digit starting from the right side, provided that the last digit of the number of votes shall be placed in the cell furthest to the right.** The cells which do not have any digit must be filled with “0”, but not strike through the empty cells.
- Shareholder may accumulate all his **Aggregate number of votes** for one nominee or for two nominees or more; provided that the total number of votes for these nominees **must be less than or equal to the Aggregate number of votes.**
